

**Avete in mente un'idea?  
Realizziamola.**

Una delle più importanti risorse per le aziende è la capacità di trasformare le idee in progetti. Ma in un mercato ad alta competitività questo non è più sufficiente. Oggi le sfide si giocano sul terreno della velocità. Raggiungere risultati prima di altri spesso fa la differenza. SIPP si propone come partner ideale per coloro che hanno la necessità di realizzare velocemente le proprie idee offrendo un servizio di prototipazione che abbatte i tempi e ottimizza l'investimento. Quindi se avete in mente un'idea, realizziamola.

*Have you an idea in mind?  
We'll make it reality.*

*One of the most important resources for companies is the ability to turn ideas into projects. This however is no longer sufficient on a highly competitive market. Nowadays, challenges are won or lost due to speed. Achieving results before the others often makes the difference. SIPP is the ideal partner for those who need their ideas to be realized rapidly, offering an exclusive fast prototype service that reduces time frames and optimises investments. So, if you've an idea in mind, we'll make it reality.*

## Continua evoluzione.

Il marchio SIPP è presente sul mercato da oltre 30 anni e vanta una lunga e riconosciuta esperienza nel settore del dispensing. Nel 2000 il marchio è stato acquisito dall'attuale proprietà con sede nella Repubblica di San Marino. Si è costituita una nuova società con l'obiettivo di conquistare una posizione di mercato in linea con la buona fama del nome SIPP. La nuova società ha adottato moderni criteri organizzativi, perfezionando le dinamiche operative, al fine di soddisfare le necessità di un mercato sempre più esigente e competitivo. Le più avanzate tecnologie e il dinamismo di un'organizzazione snella e reattiva hanno dato rinnovato vigore a una consolidata esperienza e a una grande tradizione.  
**Modernità e tradizione : un mix vincente.**

## Ricerca e innovazione.

Con l'ausilio di avanzate tecnologie e supportata dal lavoro specializzato di diversi designer alla continua ricerca di nuovi stili e nuovi materiali, SIPP arricchisce costantemente la gamma delle proprie proposte per tutti coloro che sentono il bisogno di novità e originalità.

## Massima collaborazione.

Una struttura aziendale snella e dinamica favorisce un rapporto di partnership con la clientela. Questo permette di comprendere le problematiche e affrontarle insieme per arrivare alla migliore soluzione.

*The SIPP brand has been on the market for over 30 years and boasts acknowledged and long-standing experience in the dispensing sector. In 2000, the brand was bought out by the current owners, based in the Republic of San Marino. A new company was set up aimed at gaining a market position that respected the excellent reputation of the SIPP brand. The new company has adopted modern organisational criteria and has improved its operational dynamics, in order to satisfy the requirements of an increasingly demanding and competitive market. The use of the most advanced technology and the dynamism of a streamlined and responsive organisation have given new energy to a consolidated experience and a great tradition.*

***Modernity and tradition: a winning combination.***

## COLONNE IN METALLO

METAL TOWERS

In questa sezione vengono presentate le colonne in metallo in un'ampia gamma di soluzioni estetiche che va dalle più semplici ed essenziali a quelle caratterizzate da un design ricercato e moderno. L'evoluzione tecnologica e il perfezionamento delle tecniche consentono un continuo rinnovamento degli stili. In alcuni casi alle lucenti superfici del metallo si abbinano nuovi materiali. Nascono così colonne che, oltre la loro tradizionale funzione, diventano veri e propri oggetti d'arredo.

*This section presents a series of different metal columns, ranging from the simplest and most basic pieces to those featuring a more sophisticated and modern design. Technological developments and improvements in the production techniques used mean we are constantly able to update the styles offered. In some cases, we even use new materials alongside the shiny metal surfaces. This has resulted in columns that, as well as performing their traditional function have become, to all intents and purposes, furnishing accessories.*

## COLONNE IN CERAMICA

CERAMIC TOWERS

Quando si pensa alla ceramica vengono subito in mente gli oggetti più fragili come vasi, piatti o tazzine. Ma oggi questo antichissimo impasto si è evoluto e le sue nuove applicazioni ne hanno modificato il concetto. Infatti oggi la ceramica è sinonimo di resistenza all'usura e di durata. Viene usata nelle auto sportive, negli elettrodomestici, nell'edilizia, nell'odontoiatria e perfino nel settore aerospaziale. Noi utilizziamo da anni la ceramica per realizzare le colonne tradizionali. Oggi vi proponiamo l'evoluzione di questo nobile materiale con una serie di prodotti in linea con le nuove tendenze del design e della modernità.

*Think ceramic and fragile objects, such as vases, plates and cups, immediately spring to mind. However, this ancient material has now evolved and its new applications have changed this concept. In fact, it is now synonymous of resistance to wear and tear and is used in sports cars, household appliances, in the construction sector, in dentistry and even in the aerospace industry. For years it has been used to produce traditional columns and we now offer the evolution of this noble material in a series of modern products that are in line with the latest design trends.*
